

Sporting California USA Select Program

The Sporting California USA "Select" player identification program serves as a regional identification initiative that brings together some of the most skilled players and coaches within the Sporting California USA community. Through a series of regional tryout and selection events, players will be identified to represent Sporting California Select at forthcoming domestic and international competitions. This program is specifically designed for selected players participating within our Sporting California chapters.

The primary objective of this program is to promote player development by offering athletes the chance to compete with other elite players in high-level events. The program will create a competitive environment that fosters excellence both on and off the field. Older age groups will have opportunities for exposure to college and professional scouts, as well as the chance to play abroad internationally in top-level competition. The Sporting Select Program will evaluate and select players based on their performance, current stage of development, and character within the team environment.
